ABOUT OMNIA

Omnia Metals Group Ltd (ASX:OM1) is focussed on exploring for future facing commodities used in advanced technologies, with a focus on nickel, platinum group elements and copper.

Omnia's primary focus is the highly prospective Ord Basin Project which consists of 1,305km² of tenure situated in a rapidly emerging district. The Ord Basin Project is prospective for Norilsk-style nickel-copper-PGE and stratigraphic copper mineral systems. Historical exploration has been limited in the region and as such the Ord Basin Project represents a district scale, greenfields exploration opportunity.

Omnia's exploration strategy is to complete high-powered electromagnetic and ground gravity geophysical surveys, which will be complimented by regional geochemical sampling, to delineate high-priority drill targets. Following initial geophysical and geochemical surveys, Omnia plans to complete its maiden drilling campaign in 2H-2022.
